

# Where Innovation Meets Reliability

Welcome to Quasar a pioneering leader in the field of Pharma and established with a commitment to advancing the healthcare through innovative solutions, we specialize in developing cutting edge technologies that empower healthcare.

## Quasar Labs Pvt. Ltd.

## About Us

Founded in 2006, Quasar Lab Private Limited has consistently focused on the manufacturing of high-quality finished pharmaceutical formulations and nutraceutical that meet stringent global standards

Our manufacturing facility is strategically located in Uttarakhand, fondly referred to as the **"Land of Gods,"** offering a serene and clean environment conducive to pharmaceutical production. Equipped with modern infrastructure and technology, our plant ensures compliance with international quality norms. We are deeply rooted in delivering the quality product offering a diverse portfolio of over 500 formulations.

we specialize in the manufacturing of a wide range of pharmaceutical dosage forms, including Tablet, Capsules, oral suspension. We place immense value on our customers and our dedicated employees, recognizing them as the pillars of our continued success. Our commitment lies in building lasting relationships based on trust, quality, and service.

### Vision

To be a trusted global leader in the pharmaceutical industry, dedicated to enhancing human health and well-being through the discovery, development, and delivery of innovative, safe, and affordable medicines. We strive to address unmet medical needs, advance scientific research, and ensure access to high-quality treatments across all communities. Guided by integrity, sustainability, and a commitment to excellence, we aim to transform lives and contribute meaningfully to the future of healthcare."

### Mission

To be a trusted global leader in the pharmaceutical industry, dedicated to enhancing human health and well-being through the discovery, development, and delivery of innovative, safe, and affordable medicines. We strive to address unmet medical needs, advance scientific research, and ensure access to high-quality treatments across all communities. Guided by integrity, sustainability, and a commitment to excellence, we aim to transform lives and contribute meaningfully to the future of healthcare."

### Quality policy

Quality is an integral part of our principle. Those principle guides our action to deliver the product that are safe, compliant and preferred by consumers. we are committed to manufacturing high-quality pharmaceutical product that meet and exceed national and international regulatory standards. Our goal is to ensure patient safety, product efficacy, and consistent quality through every stage of the manufacturing process. We strive to achieve the highest standards and aim to be one of the leading companies in the world of pharmaceutical. We are fully equipped with analytical and microbiology lab for the selection of raw material. Utilizing state-of-the-art equipment and validated processes to ensure uniformity, purity, and stability in every batch is manufactured.

# Our core value

## Integrity

We operate with honesty, transparency, and accountability in everything we do. From clinical trials to marketing practices, we uphold the highest ethical standards. Integrity guides our decisions, builds trust with stakeholders, and reinforces our commitment to putting patients first.

## Innovation

Innovation is at the heart of our mission to improve health outcomes. Our culture fosters creative thinking and scientific excellence to address unmet medical needs.

## Teamwork

Collaboration drives our success. We promote a culture of open communication, mutual respect, and cross-functional cooperation. By working together — within our teams and with external partners — we strengthen our ability to solve complex challenges and bring high-quality medicines to patients faster.

## Quality

We are committed to delivering safe, effective, and reliable pharmaceutical products that meet or exceed regulatory and industry standards. Every stage of our process — from research and development to production and distribution — is guided by a robust quality management system that ensures product consistency, patient safety, and regulatory compliance.
